

WEBINAR SERIES

Developing an Effective and Compliant CMS Emergency Preparedness Program (EPP) for Inpatient Facilities

CAHs, Hospice Facilities, Hospitals, ICF/IIDs
LTC Facilities, PRTFs, RNHCIs, etc.

Catastrophic hurricanes, floods, tornadoes and terrorism are a few disaster realities of recent years that served as the catalyst for the new Centers for Medicare & Medicaid Services (CMS) Conditions of Participation. These detailed requirements are applicable to all Medicare and Medicaid participating providers and have a significant effect on inpatient facilities in particular. This four (4) part webinar series will:

- provide a clear overview of the new requirements.
- detail the components of a comprehensive Emergency Preparedness Program (EPP).
- guide facilities on how to develop policies and procedures.
- clarify changes in training and testing requirements and steps to comply.

With the enforcement of new regulations commencing on **November 15, 2017**, this program will give providers the knowledge necessary to develop compliant and effective EPPs. Although Assisted Living facilities are not required to meet the CMS Emergency Preparedness rule, the webinar programs will include best practices for all inpatient locations and they are encouraged to participate.

FOUR (4) 1-HOUR WEBINARS – NO COST TO PARTICIPATE

October 3, 11, 18 & 20, 1:30 - 2:30pm (EST)

Presented by Russell Phillips & Associates

TOPICS by SESSION

1. The First Steps

- Develop your EPP Team
- Assess your current program to the CMS Final Rule
- Hazard Vulnerability Assessment
- Mitigation plans with community partners

2. The Foundation Plans

- Plan Activation & Incident Command
- Communication Plans
- Full Building Evacuation Plans

3. Emergency Operations Plans

- Disaster Specific Planning
- Loss of Utility Plans
- Resource and Asset Planning

4. Training and Testing

- Training for all levels of leadership and staff (Examples: frequency, employee matrix, documenting competency)
- Exercises: Types, planning and execution (HSEEP super-light)
- Documentation: After-Action Reports and Improvement Plans
